# UPDATE ON GRAVITATIONAL WAVES DETECTION

STREAMING OF LIGO PRESS CONFERENCE

11th February 2016 · 16:00 · Room A

This year marks the 100th anniversary of the first publication of Albert Einstein's prediction of the existence of gravitational waves. The Laser Interferometer Gravitational-wave Observatory (LIGO) have organized a press conference to share with the scientific community the recent state of art and updates on recent efforts to detect the gravitational waves.

Everyone is invited to join us and share this important moment for physics. The streaming of the video conference will be on 11th of February, at Physics Department, Room A, at 16:00.

**Contatti:** M. Tuveri ([matteo.tuveri@ca.infn.it](mailto:matteo.tuveri@ca.infn.it)), M. Cadeddu ([matteo.cadeddu@ca.infn.it](mailto:matteo.cadeddu@ca.infn.it))
